Electro Post EP-10 Box Support Bracket

PATENT PENDING

Cat# EP-10

For all standard stud widths of 2-1/2", 3-5/8", or 6"

Cat# EP-10
Unformed/As Boxed

- Mount boxes to either side of the bracket;
- Works with all stud wall widths 2-1/2", 3-5/8", or 6";
- 5 times faster than current installation methods;
- No tools needed during installation other than a screw gun and screws;
- Square post design adds strength and allows installation of boxes on opposite sides of the post;
- U.S. Made 24 gauge galvanized or stainless steel construction.
- Product will be installed prior to sheet rock being placed on either side of stud framing.

MOUNTING INSTRUCTIONS

Step 1 Fold bracket to form square tube post and secure by inserting tabs into slots.

Step 2 Fold bracket mounting flanges to accommodate intended wall stud width (2-1/2", 3-5/8", or 6").

Step 3 Attach box(es) to either side of EP-10 with standard fasteners.

Step 4 Bracket can be loaded with 4" or 4-11/16" square boxes and assembled with boxes and mud rings as required prior to installation (on stud) in prefab shop or on site.

Step 5 Bracket fastened to intended wall stud with (3) #10-16 min 5/8" long Tek screws on each side of bracket prior to installation of drywall.

Cat# EP-10
Folded in Square Tube

- 24 gauge galvanized or stainless steel **construction**;
- 50 pcs/box;
- Box weight of 20 lbs.

Cat# EP-10
Application on a Stud Bracket

Installation Detail:
See Mounting Instruction - Step 5

Additional Features:

- **Safer solution: no need to reach all the way up to the building steel - eliminating need of using ladder in excess of 10' height or more;**
- **Mount boxes by eliminating height dangerous jobs;**
- **Safer for electricians to work with - accessibility and consistent height thru-out building.**

Customer must satisfy all codes and owners' specifications.
